

Nassau Engineering Ltd

Perfectly Precise.

NASSAU ENGINEERING

MAKING THINGS BETTER

Engineering has been described as the application of science to industry. In simple terms, it's about making things better. Be it a single machine component or complete manufacturing facility, it needs to be designed and built in such a way that it works and works well. It must serve a purpose and make a difference.

And that is what we do. We make things better. We add real value. Through smart thinking and common sense, we achieve better design and superior results. We increase productivity and improve workflow. By remaining focused and working together, we can help make a real difference to your bottom line.

OVER 25 YEARS

EXPERIENCE

Established in 1976, Nassau Engineering has steadily grown to become a key player in the market place. Based in Dublin, we provide a wide range of products and services to a cross section of commercial clients.

In an engineering environment that's rapidly evolving and hugely competitive, we continue to make our mark by combining a professional service with a personal approach. We work closely with all our clients to understand their core business and achieve their key objectives.

At Nassau Engineering, we represent a new generation of mechanical engineers. We're innovative and collaborative with a proven record of managing complex projects from concept to construction. Our strategic alliances with key suppliers and industry experts ensure we remain at the cutting edge of new technology.

We also place a great emphasis on quality control, health and safety and environmental sustainability. All in all, we make sure that our products and services meet specific needs and deliver real benefits.

Our skilled workers are equipped to produce your materials on-site or in our state-of-the-art premises in Dublin.

Custom built Stainless steel Counter and fittings for modern restaurant.

OUR CLIENTS

We've been around for almost thirty years and during that time we've worked with some of Ireland's leading companies. Our client base is wide and varied and includes food and drink processors, chemical and pharmaceutical manufacturers, building contractors and architectural firms.

Because of our proven record in engineering projects, much of our business is repeat custom. We've gained a reputation for delivering quality work on time and within budget. We save our clients considerable expense by doing the job right first time, every time.

We fabricate:

Composite panels, facia cladding, parapet pressings, soffits and cills brise soleil stainless steel and aluminium curtain wall accessories, outdoor canopies - stainless steel and glass.

Stainless Steel access platform,
built with Stainless Steel high
specification handrails.

"WE CREATE SOLUTIONS."

OUR PRODUCTS

STAINLESS STEEL

From large storage tanks and processing equipment to small parts and components, we design and manufacture a wide range of stainless steel products for use in industry. As a base material, stainless steel is without equal. It's non-corrosive and highly resistant, extremely versatile and most adaptive, very economical and low maintenance. It's little wonder then that it's widely employed as the building material for many fixtures and fittings in manufacturing companies, most notably processing plants involving food and drink, chemicals and pharmaceuticals.

Stainless steel smoking booth built to requirements , complete wit stainless steel seating, stainless steel ashtrays and stainless steel catch bins.

Stainless steel high quality process tanks complete with heater jackets & rebo unit to maintain temperatures 0-90

OTHER PRODUCTS & SERVICES

PLASMA CUTTING • PURGE WELDING • HIGH FREQUENCY WELDING • SPOT WELDING • MACHINING
• COMPONENTS • PRESS BRAKE WORK • PIPE BENDING • DESIGN WORK • PLAN DRAUGHTING •

Lugs & Pressings

For many different applications in many different industries, we make a wide variety of lugs and pressings. From initial design to final completion, we produce dozens of types for dozens of companies at home and abroad. Our designers and engineers are highly qualified and very experienced, well used to dealing with specific requirements and complex issues.

Stainless Steel Windows

At Nassau Engineering, one of our core competencies is stainless steel window construction. No order is too big or too small. All our windows are custom built and quality assured. We guarantee a finished product that's technically effective and economically efficient.

Stainless Steel Doors

Long lasting, fully functional and aesthetically pleasing, stainless steel doors are widely used in private, commercial and industrial sectors. Structurally sound, tension free and clear surfaced; our doors are economical to build, easy to install and practical to maintain.
